MDO — Masonite

PSS MDO

PSS's MDO PLYWOOD is made of high-quality, exterior-grade plywood with the same adhesives used in marine plywood. A medium density overlay (MDO), which is made of a resin-coated fiber, is laminated to two, 2-step sanded finished sides (DOUBLE FACED) or one, 2-step sanded, finished side (SINGLE FACED) and a moisture-resistant backer sheet (Resin Backer) for balance and weather resistance

UV6 HIGH-GLOSS WHITE BOARD FINISH — PSS EXCLUSIVE!!!

- Utilizes a urethane-acrylic coating system that is UV-cured for a durable, hard, chip and scratch-resistant surface.
- The high-gloss surface is ready for pressure-sensitive vinyl and lettering paints.
- Boards with one or two sides finished with the UV6 coating system also have edges that have been coated with a specially-formulated, urethane-acrylic edge sealer and do not require resealing.
- Cut edges or exposed wood at holes or openings be resealed to retard moisture penetration which could lead to swelling and panel and finish degradation.

RESIN BACKER

- To block out resin backer: DANA D303 WHITE BLOCKOUT PRIMER has been used with good results.
- For a finer finish, topcoat D303 Primer with Chromatic Bulletin or Background Enamel. No special prep required. Remove all foreign matter as with any other surface.

P/P = Prime/Prime

P/R = Prime/Resin Backer

E/R = Enamel/Resin Backer

3/8" SINGLE FACE

DESCRIPTION	ID#
3/8" 4' X 8' P/R	.110
