

Gator, Fome & Sign Boards

MAGNETIC SIGNS

- **IMPORTANT MAGNETIC INFORMATION.** Before applying our flexible magnetic material to a smooth metal surface, make sure the area is clean and dry. If you are adhering magnet to a vehicle, make sure the paint, wax or clear coat is cured.
- **PREPARATION.** Prepare surface of vehicle by cleaning, drying and waxing before application of sign.
- Be sure sign is clean and dry.
- **APPLICATION.** Place one edge of sign at designated area of metal surface. Allow remainder of sign to contact metal surface.
- If alignment of sign is incorrect, remove and reposition. Do not straighten sign by pulling when it is magnetically affixed to vehicle.
- It is important that the entire magnetized side adheres to steel surface to avoid air pockets.
- **TEMPERATURE.** Temperature of surface is unimportant; however, the sign should be at least 60°F for installation.
- **CLEANING.** To avoid moisture collecting between sign and vehicle, remove sign once a week.
- Wipe dry both sign and vehicle. Use mild detergent in warm water to clean vinyl sign surface.

MAGNETIC SIGNS

RUBBERSTEEL

- .025" flexible, magnetic-receptive material that holds magnets and magnetic roll material like steel,
- Easy to apply with adhesive on the back and is flexible to conform to gently curved areas.
- Will hold magnetic materials, yet it has no polarity of its own. Can be hand cut, punched, scored or stamped.
- Adheres to any clean smooth surface such as plastic, finished wood, aluminum and Formica and does not rust.
- USES – Message boards, menu boards, trade shows, exhibit booths, planning and schedule boards, aisle markers and any other application calling for easy changeability.

PLAIN ADHESIVE BACK

- Natural brown front with adhesive back.
