- DPF 6000X has excellent ink receptivity and a high-gloss finish, which will make your images "POP"!
- The media is soft, which allows flexibility around the compound curves and deep channels found on most vehicles.
- The X-scape, bubble-free technology makes installing complete vehicle wraps a snap! Bubbles disappear with the press of a finger!!
- The DPF 6000X adhesive has a strong bond with the face stock, eliminating the need for adhesive promoters and primers. This feature is unique to DPF 6000X and out performs other media by significantly lowering the amount of "channel pop-ups" when it is applied in deep channels and corrugations.

Prices are subject to change without notice.
